

EUROPEAN MASTER OF SCIENCE IN OCCUPATIONAL THERAPY

Master, part-time

2023-2024

This master aims to further develop your scientific competences and research skills. It offers a vibrant learning community with multi-national and multi-lingual faculty and students who possess a wealth of experiences in education, research and practice.

TRULY INTERNATIONAL

TRULY INTERNATIONAL As a graduate you have the international perspective and evidence-based approach that will help solve problems in health and social care systems and undertake quality improvement and research projects to enhance practice.

The European Master of Science in Occupational Therapy offers you high quality education at five participating universities. During the first year you travel to attend classes in Eastbourne (England), Amsterdam (The Netherlands), Winterthur (Switzerland) and A Coruña (Spain). Each trip lasts two weeks. The second year will bring you to Stockholm (Sweden) for one week.

MASTERSTUDENT

Bianca ten Rouwelaar
Advisor Social Support Act

I wanted to increase my understanding of research. During the master I develop skills in Evidence-Based Practice and I think about why people act the way they do, which enriches the guidance of clients. It is of course also a real treat to study in five countries!

FACTS & FIGURES

EUROPEAN MASTER OF SCIENCE IN OCCUPATIONAL THERAPY
